

# Elevate Your Invoice Processing

## Current State

## MetaSource Elevated AP

**Emailed invoices**

Requires manual handling due to non-conforming file types, multiple invoice PDFs, etc.

Converts any paper or email invoice into the right format for processing

**Invoice data capture accuracy**

At best, OCR provides 90% accuracy, and requires invoices to be manually processed

Guaranteed 99.95% accuracy

**Exceptions handling**

Requires expensive and hard to find knowledge workers

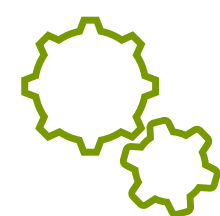

Our AP experts can resolve most invoice exceptions on your behalf

**ERP posting**

Even more manual handling for matching and coding

Touchless 2-way and 3-way matching with validation and advanced line-item pairing

**Scalability**

Must hire more staff and buy more licenses as invoice volumes grow

Rapidly scale the system without the need for more staff or licenses

**Return on investment**

**No telling**

**Start saving from Day 1**

**Start elevating your invoice processing**
